Dear Sir:

A telephone interview is respectfully requested at 10:00 a.m., Monday, February 22, 2010 to discuss the final rejection of claims 1-2, 4, 6-7, and 11-16 under 35 USC 102(b) as being anticipated by Y-C. Shi (U.S. Patent No. 6,890,571). Please note that claim 1 requires 2-70% short-chain amylose; however the reference to Shi disclosed a short-chain amylose content of about 98% (see page three, first paragraph of the Final Office Action). We believe that this alone is sufficient for the Office Action to be reissued as a 35 USC 103 rejection, if indeed the Examiner considers that to be feasible. However, it is submitted that the application as pending with regard to that particular claim should be deemed allowable on that distinction alone.

Respectfully submitted,

John B. Hardaway, III
